Who We Are

Newlook Capital Industrial and Infrastructure Services Fund III (IISF III) is a private equity fund focused on developing a robust portfolio of investments in the industrial and infrastructure service sectors.

Fund Thesis

We believe owning businesses with a portion of revenue derived from recurring service requirements, such as regulatory compliance or the maintenance and support of essential infrastructure, provides stable and predictable cash flow that is resilient throughout economic cycles.

Market Opportunity

- Targeted 8% annualized distribution, paid quarterly
- Contracted or recurring revenue streams
- Recession resilient companies
- Exposure to essential service providers
- Diversified across industries and geographies
- Uncorrelated with other asset classes
- Upside potential through NAV appreciation

Recurring Revenue Focused^{2,4}

IISF III has observed a consistent year-over-year growth in service revenue from existing portfolio companies that operate under multi-year service contracts for regulatory compliant devices or systems. With this successful track record of company revenue growth, several successful exits and a flawless distribution record, IISF III remains fixed on long term capital appreciation with a reliable distribution. Looking forward, IISF III is focused on acquiring companies that have significant recurring revenue and potential for value enhancement.
